

MAGIC-NK

Product identification

Trade name **MAGIC-NK**
Type of product **EC fertilizer.**

Composition (w / w%)

Nitrogen (N) 2.50%
Potassium (K2O) 6.00%
Iron (Fe) chelated EDDHA, soluble in water 6,00%

Properties

MAGIC-NK is an Iron Chelate (Fe-EDDHA), with a minimum of 4.2% ORTO-ORTO, specially designed and formulated for the correction and / or prevention of iron deficiency observed in different cultures. Its use is especially recommended for calcareous soils with basic pH. MAGIC-NK brings Iron to crops in a totally assimilable form. Nitrogen and potassium are essential elements for the plant, they increase its resistance to different biotic and abiotic stresses, they also play a key role in the process of transpiration and photosynthesis.

Doses and applications

MAGIC-NK can be applied, as soon as the first symptoms appear, by dilution with irrigation water or by fertigation. Thanks to its completely assimilable formulation MAGIC-NK can be applied by both foliar and fertigation routes. This last route is preferably recommended for obtaining the best results. Avoid application during periods of strong sunlight.

Doses and applications	
Foliar	50 - 250 g / 100 L of water. Perform a minimum of 1 to 3 applications with an interval of 7 - 15 days.
root	1 - 5 kg / ha per application. The number of applications depends mainly on the needs of each crop and the degree of iron deficiency

Safety instructions

- Keep out of reach of children
- Do not eat and drink during application
- Do not breathe product vapor
- Keep away from food, beverages and feed
- In case of contact with eyes, rinse immediately with plenty of water and seek medical advice
- Wear protective gloves and eye / face protection.
- In case of accident or if you feel unwell, seek medical advice immediately (show the label where possible)
