

REDUCAB

Product identification

Trade name **REDUCAB**
Type of product **EC fertilizer.**

Composition (w / w%)

Nitrogen Total (N) 15% (w / w)

Properties

The effectiveness of a large number of plant protection products and fertilizers is directly related to the hardness and pH of the water in which they dissolve. REDUCAB is a regulator specially designed to adjust these parameters. It acts as a pH regulator of the water and improves the physicochemical properties of the soil, promotes the rapid assimilation of the nutrient and its absorption by the plants.

Doses and applications

By its fully assimilable formula, REDUCAB can be applied by foliar or root.
Mix REDUCAB with irrigation water before adding pesticides and after adding fertilizer.

Leaf dose	Root Doses
50-100cc / 100 liter some water.	<ul style="list-style-type: none">• Irrigation system cleaning: Apply 1L / 1m³ of irrigation water (10-25L for 1000L tank).• Reduction of soil pH: Apply 20-25L / Ha to lower the average pH in the first 40 cm of soil.

Safety instructions

- Keep out of reach of children
- Do not eat and drink during application
- Do not breathe product vapor
- Keep away from food, beverages and feed
- In case of contact with eyes, rinse immediately with plenty of water and seek medical advice
- Wear protective gloves and eye / face protection.
- In case of accident or if you feel unwell, seek medical advice immediately (show the label where possible)
